Sequence length and teacher validation preference (eligible cohorts)
pythia-160m-seed1 / pig / ex10-20_prefix_n100k / N=64
rho = -0.667
Teacher p(pig), validation set (logit)
Mean integers per sampled completion
pythia-160m-seed2 / cat / ex10-20_prefix_n100k / N=10
rho = 0.382
Teacher p(cat), validation set (logit)
Mean integers per sampled completion
pythia-160m-seed2 / dog / ex10-20_prefix_n100k / N=10
rho = -0.491
Teacher p(dog), validation set (logit)
Mean integers per sampled completion
pythia-160m-seed2 / lion / ex10-20_prefix_n100k / N=10
rho = -0.370
Teacher p(lion), validation set (logit)
Mean integers per sampled completion
pythia-160m-seed2 / pig / ex10-20_prefix_n100k / N=10
rho = -0.394
Teacher p(pig), validation set (logit)
Mean integers per sampled completion
pythia-160m-seed3 / cat / ex10-20_prefix_n100k / N=10
rho = 0.018
Teacher p(cat), validation set (logit)
Mean integers per sampled completion
